#### SOLAR PANELS

North facing raking pv cells fix to the trusses.

#### ROOF TRUSS

A series of prefabricated roof trusses span across the corners of the containers coming to ground only where there is an over hang. The trusses are wrapped to accommodate insulation and services.

#### FIRST FLOOR CONTAINERS

On the first floor the containers are stacked within the ground floor modules and wrapped in the stud frame. In this instance a courtyard is created by leaving some of the timber studs open.

#### GROUND FLOOR MODULES

The collection of modules is wrapped in an insulated timber stud frame. Windows shutters, screens and solid panels in fill this framework.
